DETAILED ACTION

Claim Rejections - 35 USC § 102

Claims 17-34 are rejected under 35 U.S.C. 102(e) as being anticipated by Benno (6,728,669).

As to claim 17, Benno teaches a system for coding speech signal, comprising:

An encoder (602), where the encoder determines candidate pulse position (400), and where the candidate pulse positions are divided into a first track (406) and a second track (408) where the second track is dynamically defined based on the pulse position of the first track (909).

As to claim 18, Benno teaches where the second pulse position is near the position of the first pulse position (Fig.5).

As to claims 19-20, Benno teaches where the position of the peak in the fixed codebook is determined from the result of the pitch prediction (722) and wherein the candidate pulse position is constructed (734) having at least one track.

As to claim 21, Benno teaches an adaptive codebook (732) for searching the main peak generated by the pitch predictor.

As to claims 22-23, Benno teaches that the pulses are located near highest energy or peaks (Fig.4, 400).

Claims 29-34 are analogous to the claims above and are rejected for the foregoing reasons by Benno.

Allowable Subject Matter

Claims 1, 13, 15 and 16 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: the claims are allowable, because, Benno doesn't teach where the first and the second tracks in the fixed codebook represent non-periodic and periodic pulse positions as recited in the claims.

Preliminary amendment

The preliminary amendment filed on 10/28/2002 is received by the office.
